## Matt -

I sincerely appreciate the background files on the new UAA for Coffee Creek and Mossy Lake - helpful.

## Don

Matt Hubner Don, Philip Crocker asked if I would forward this... 05/17/2011 09:47:08 AM

Subject: Georgia Pacific Crossett correspondence - UAA

## Don,

Philip Crocker asked if I would forward this information to you regarding our recent correspondence on GP Crossett and their proposed UAA:

In April of 2010, GP Crossett and ADEQ visited the EPA Region 6 office to discuss their opposition to our support of an EPA-produced UAA which concluded that an aquatic life use was attainable in Coffee Creek and Mossy Lake. After that meeting EPA issued the following correspondence: [attachment "Signed ADEQ\_GP Meeting Response.pdf" deleted by DonaldF Anderson/DC/USEPA/US] [attachment "ADEQ\_GP Meeting Response Enclosure 4.21.2010 draft final.pdf" deleted by DonaldF Anderson/DC/USEPA/US]

ADEQ prepared a response, in July but not received until August, indicating that they were working with GP Crossett to conduct their own UAA, per our options in the previous letter (see enclosure): [attachment "2010.07.06 GP Crossett letter to M.Flores from TM received 8.6.2010.pdf" deleted by DonaldF Anderson/DC/USEPA/US]

Region 6 forwarded the following response, indicating that the state and facility should collaborate with EPA early and often. Communications with our Division Director have indicated that the goal of this UAA is to develop a limited aquatic life sub-category :

[attachment "Response to TM 9.13.2010.pdf" deleted by DonaldF Anderson/DC/USEPA/US]

ADEQ recently met at the GP facility, in Crossett, to observe plant operations, discuss study preparations, and scout potential reference locations. EPA was invited, but staff was unable to attend. To date, we have not received any sort of workplan or QAPP. Therefore, I have little to offer in the way of details regarding the UAA and its development.

Hope this provides some insight on recent activities.

Matt
